## Endermologie

1246 High Street Armadale 3143  
(03)95000688  
www.imageatkatan.com.au

### INTRODUCING ANOTHER FIRST – ENDERMOLOGIE TECHNOLOGY - NATURAL FACELIFT, BODY SCULPTING AND CELLULITE REMOVAL

Endermologie is the science of cell stimulation developed by LPG. It reactivates deep dormant cellular activity by mechanically stimulating the skin (Mècano-Stimulation), which is painless and non-invasive. **It is effective for localised fat, sagging skin, cellulite, excess fatty tissue, improved circulation, re-sculpted body, increased collagen and elastin production and firmer skin.**

#### FRANCE MEDICAL

France Medical is the supplier of all our other technologies and they are now working with LPG to bring you this amazing technology. Image At Katan are proud to be the exclusive operators for the Armadale/Malvern area.

#### HOW DOES IT WORK?

Endermologie reactivates cellular activity by mechanically stimulating your skin (Mècano-Stimulation) using a pleasant and non-aggressive technique.

Endermologie treats different target tissues and has a wide variety of uses.

Equipped with Rolls (rollers) or Lifts (flaps), the treatment heads gently grasp the skin tissue and target different areas of the body and face using the 100% natural Mècano-Stimulation technique.

Endermologie can be used to treat different skin areas with a very wide range of applications.

#### WHAT IS MÈCANO-STIMULATION?

Mècano-Stimulation is an action principle that is recognised and proven by the scientific community. Mechanical stimulation on the surface of the skin sends a signal deep down to the cells (fat cells and fibroblasts) to provoke a physiological response (activation of collagen and elastin production or activation of lipolysis).

#### THE PROCESS

An initial assessment of a client's condition will determine the likely number of treatments necessary to achieve the result they desire.

The Endermologie machine can be used up to 2-3 times per week, ensuring treatments are evenly spaced apart, until the desired result is achieved.

*NOTE: It is suggested that a minimum number of treatments is 10-15.*

## W▶O75

Collagen Stimulation

1246 High Street Armadale 3143  
(03)95000688

[www.imageatkan.com.au](http://www.imageatkan.com.au)

### SPL COLLAGEN STIMULATION

SPL (Square Pulse Light) is the latest generation technology from France.

Discover a luminous complexion and firmer skin thanks to the W▶O75 technology dedicated to your beauty.

#### FRANCE MEDICAL

France Medical is the only company in the world with SPL flash technology that makes the difference to IPL. Image At Katan are proud to be the exclusive operators for the Armadale/Malvern area.

#### PRINCIPLE OF PULSED LIGHT... HOW IT WORKS?

The Firmness or 'bounce' of the skin is determined by the protein collagen, found in large quantity in the dermis.

The collagen is stimulated by cells called fibroblasts which start to decrease when we reach 35, explaining the formation of lines and wrinkles.

Our controlled heating process of the dermis and the light emitted by the W▶O75 will lead to contraction of the current collagen and will stimulate the natural fibroblast cells.

The skin becomes firmer and bouncier, the texture of the skin will regain its natural radiance with results visible in the first month of the treatment plan.

#### PEACE OF MIND

You are in good hands... a total of 12 stages of security measures guarantees a purely professional treatment. The W▶O75 Collagen stimulation device adheres to the strictest regulations and has been certified with the Medical CE Certified in Europe as well as TGA registered. Your beautician is supported by the medical team behind program W▶O75 ... treating you in complete confidence.

#### THE PROCESS

The W▶O75 collagen stimulation process begins with a patch test and a consultation. We generally wait for 24-48 hours to ensure there is no reaction (if no test on our other machines has been done) before beginning treatments.

**NOTE:** It is recommended that you would require 8 weekly sessions then one maintenance session every 2 months on average to maintain results.

## SPL SKIN PIGMENTATION

SPL (Square Pulse Light) is the latest generation technology from France.

Forget all about sun and age damages thanks to the P>O75 technology. Only a few sessions are required to significantly reduce blemishes (sun spots) and other kind of localised hyperpigmentation of your skin.

### FRANCE MEDICAL

France Medical is the only company in the world with SPL flash technology that makes the difference to IPL. Image At Katan are proud to be the exclusive operators for the Armadale/Malvern area.

### PRINCIPLES

SPL Pigmentation treatment is using a target called chromophore. This chromophore is the melanin (pigment) of the skin.

The heat of melanin by the light produced by the P>O75 device will destroy it. The result of this melanin degradation is then resorbed by the macrophages cells (white blood cells that engulf and digest cellular debris and foreign substances).

### PEACE OF MIND

You are in good hands; a total of 12 stages of security measures guarantee a purely professional treatment. The P>O75 skin pigmentation device adheres to the strictest regulations and has been certified with the Medical CE Certification in Europe as well as TGA registered. Your beautician is supported by the medical team behind program P>O75 treating you in complete confidence.

### THE PROCESS

The P>O75 skin pigmentation process begins with a patch test and a consultation. We generally wait for 24-48 hours to ensure there is no reaction (if no test on our other machines has been done) before beginning treatments.

**NOTE:** It is recommended that you would require a minimum of 2 and up to 3 sessions to obtain the best result.

## SPL SKIN PIGMENTATION

SPL (Square Pulse Light) is the latest generation technology from France.

Forget all about sun and age damages thanks to the P>O75 technology. Only a few sessions are required to significantly reduce blemishes (sun spots) and other kind of localised hyperpigmentation of your skin.

### FRANCE MEDICAL

France Medical is the only company in the world with SPL flash technology that makes the difference to IPL. Image At Katan are proud to be the exclusive operators for the Armadale/Malvern area.

### PRINCIPLES

SPL Pigmentation treatment is using a target called chromophore. This chromophore is the melanin (pigment) of the skin.

The heat of melanin by the light produced by the P>O75 device will destroy it. The result of this melanin degradation is then resorbed by the macrophages cells (white blood cells that engulf and digest cellular debris and foreign substances).

### PEACE OF MIND

You are in good hands; a total of 12 stages of security measures guarantee a purely professional treatment. The P>O75 skin pigmentation device adheres to the strictest regulations and has been certified with the Medical CE Certification in Europe as well as TGA registered. Your beautician is supported by the medical team behind program P>O75 treating you in complete confidence.

### THE PROCESS

The P>O75 skin pigmentation process begins with a patch test and a consultation. We generally wait for 24-48 hours to ensure there is no reaction (if no test on our other machines has been done) before beginning treatments.

**NOTE:** It is recommended that you would require a minimum of 2 and up to 3 sessions to obtain the best result.

**SPL SKIN PIGMENTATION  
PRICELIST**

<b><u>ZONE TREATED</u></b>	<b><u>PRICE</u></b>
Forehead	\$ 65.00
Nose & Lower Face	\$ 90.00
Full Facial	\$149.00
Décolletage	\$130.00
Hands	\$ 85.00
Face, Décolletage, Hands	\$350.00
Half Arm	\$165.00
Full Arm	\$295.00
Half Upper Bac	\$295.00

**INDIVIDUAL SPOTS**

From \$35 each

**DON'T FORGET TO ASK ABOUT OUR MONTHLY SPECIALS!**

*Please note:* Any pigment in the skin from spray/fake tans and make-up will mean the treatment cannot go ahead. You must wait for 2 weeks after having a spray/fake tan before having treatments. Tattoos must be covered during treatments (we take care of this). Sun sensitive medications are an issue, making your skin much more sensitive; treatment cannot go ahead whilst you are taking the medication.  
If you have any further enquiries, please discuss them with your beauty therapist in your initial consultation.

### ACNE TREATMENT

SPL (Square Pulse Light) is the latest generation technology from France.

Just a few sessions are required to reduce skin lesions. Forget all about acne and recover a unified and lifted skin in a couple of months.

### FRANCE MEDICAL

France Medical is the only company in the world with SPL flash technology that makes the difference to IPL. Image At Katan is proud to be the exclusive operator for the Armadale/Malvern area.

### RECOVER A SPOTLESS AND SMOOTHER SKIN

The E▶Clean is a cutting edge IPL device dedicated to the treatment of inflammatory and retentional acnes for adults and teenagers. It has been designed to be used on skin phototype I (fair) to IV (olive skin, Asian/Mediterranean/Middle Eastern skin types) and is recommended for acne grade I to V on Burton Scale.

Adults suffering from acne have to take an examination before to target the origin of the acne before to be treated with Intense Pulsed Light.

### PEACE OF MIND

You are in good hands... a total of 12 stages of security measures guarantees a purely professional treatment. The E▶Clean device adheres to the strictest regulations and has been certified with the Medical CE Certification in Europe as well as TGA registered. Your beautician is supported by the medical team behind program E▶Clean treating you in complete confidence.

### THE PROCESS

The E▶Clean acne treatment process begins with a patch test and a consultation. We generally wait for 24-48 hours to ensure there is no reaction (if no test on our other machines has been done) before beginning treatments.

**NOTE:** It is recommended that you would require 4 weekly sessions (additional treatments can be necessary depending on the lesions). Clients will have to wear a 30+ SPF sunscreen to protect the skin from the sun during and 3 weeks after the treatment protocol.
